About CME

This CME is composed of lectures and hands-on sessions in Transfusion Medicine. The Interactions on Day 1 will be for the understanding of the basics of Immunohaematology with corresponding hands-on sessions for the same.

The sessions on day 2 have been carefully curated to include Transplant Immunology, quality control and more recent topics like AI and Six Sigma. The workshop will expose the participants to advanced Immunohaematology techniques.

Participants will also have a chance to exhibit their work through poster sessions on the second day of the event.
